# OPTIMIZE EVERYTHING. ACCELERATE SUCESS

In the food industry, the difference between competing and leading lies in the ability to transform processes. Automation is no longer an option: it is the driving force that enables companies to scale, innovate, and respond to an ever-changing market.

Optimizing the production chain means unlocking resources, reducing costs, and raising the quality of every product. It means moving from manual to intelligent, from linear to connected, from predictable to truly efficient.

Companies that invest today in cutting-edge technology and machinery don't just gain speed—they gain competitive advantage. Digitalizing, robotizing, and automating is how you accelerate success: shortening delivery times, ensuring consistency, and opening the door to new business models.

Expo Foodtech & PickPack Expo brings together the leaders who are building the new era of the food industry: more productive, more profitable, more sustainable. Because the future of the industry is not improvised—it is optimized.

## PARTICIPATION OPTIONS

### PARTNER

The best option is to show your leadership in the sector and stand out from the competition. Locate your booth in the best area of the expo, gain the maximum visibility, participate in the congress, and invite your best clients and prospects, amongst many more activities.

### EXHIBITOR

Present your products and solutions to thousands of potential buyers in the expo zone. Choose between Premium Zone to enjoy the major traffic to your booth, or Business Zone to economize your investment.

### NEWCOMER

We know how difficult beginnings are. That is why we offer a "Turnkey Pack" so you can participate in the most innovative event in the sector, with the minimum investment.
